## Objectives

The aim of this project proposal is the design and implementation of the SMARTCHAINH24, a vending machine that delivers products from the short chain (fresh, processed, fruit extracts, milk) connected to a platform ICT for buying / booking e-commerce. The constituting operative group will guarantee the promotion of the project activities and the diffusion of the results. The aim of this project proposal is to meet the needs of the main actors in the food supply chain through the design and implementation of the SMARTCHAINH24, a vending machine that delivers products from the short chain (fresh, processed, fruit extracts, milk) connected to a platform ICT for buying / booking ecommerce.

## Activities

The goal of the GO is to design and build the SmartchainH24 prototype which will be made up of different blocks, depending on the type of references. The prototype, connected to a web platform, will allow the e-commerce sale or the reservation of the product, so that the consumer can ensure its availability. The platform in turn represents an important showcase for producers as each of them will be able to promote their company and their products

Partenariato

## Cooperazione per la creazione e divulgazione del prototipo distributivo di filiera corta SMARTCHAINH24
