

MORE THAN ORGANIC: innovative management for cherries and table grape organic cultivation

Riferimenti

Tipo di progetto

Gruppo Operativo

Acronimo

OLTRE.BIO

Tematica

Agricoltura biologica

Information

Time frame

2020 - 2022

Durata

24 months

Partners (no.)

11

Regione

Puglia

Comparto

Multifiliera

Localizzazione

ITF43 - Taranto

ITF47 - Bari

Costo totale

€498.600,00

Fonte di finanziamento principale

Programma di sviluppo rurale

Programma di sviluppo rurale

Project status

ongoing

Objectives

Transfer of innovations in agronomic techniques in organic farming (canopy, soil, irrigation and nutritional management), implementation of phytosanitary control, in order to optimize yields, maturation, nutraceutical characteristics and performance in cold storage of table grapes and cherries, guaranteeing the consumer a monitoring of the same also on the packaging on the market. Use of IoT (Internet of Things) tools both in the open field and in post-harvesting to constantly monitor the products of the two production chains "from field to table".

Activities

1. Management of the biological fertility of the soil in cherry and table grape vineyards;
2. Innovative strategies for the control of Tignoletta, cochineal in organic vineyard, Moth rigata, Thrips in organic vineyard;
3. Integrated innovative strategies for the containment of Erysiphe necator and rot from Botrytis cinerea, Aspergillus, Penicillium, Monilia (Monilinia spp) and Gray mold (Botrytis cinerea)
4. Strategies for the control of diptera in organic cherry trees;
5. Shock treatments with gas inserts in post harvest;
6. transfer of the Blow device application protocol for long-term storage;
7. creation of a Blow applicator to be installed online on the flow-pack.
